

## New Accounting Standards and Interpretations – 30 June 2021

### Introduction

This document summarises the changes in Accounting Standards and Interpretations issued as at 30 July 2021 applicable for entities with a **30 June 2021 financial year end**. The document contains 2 parts:

**Part A** - This table lists all the new and amended Accounting Standards that are applicable for the first time.

AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors* describes the disclosures required to be made in the financial statements when the initial application of a Standard has an effect on the current period or any prior period.

**Part B** - This table lists all the new and amended Accounting Standards that have been issued but are not yet mandatorily effective.

Entities may elect to early adopt these Standards (except where indicated). AASB 108 requires an entity to disclose the possible impact of new and amended Accounting Standards that have been issued but are not yet effective. Entities should disclose the full list of Standards and Interpretations issued but not yet effective and their impacts **unless that particular Standard or Interpretation is clearly not relevant for that type of entity**. For example, a for-profit private sector entity need not disclose those Standards relating to not-for-profit or public sector entities.

Entities that claim compliance with IFRS must also consider new or amended standards that have been issued by the IASB but for which an Australian equivalent has not yet been issued by the AASB. Such Standards are separately identified in Part B of this document.

This document does not list all the amendments that have been made to Tier 2 disclosure requirements applicable under AASB 1053 *Application of Tiers of Australian Accounting Standards* (i.e., the Reduced Disclosure Regime).
